

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A process for the handling of ~~objects~~ containers, comprising handing over the containers to an intake station on a rotating conveyor, conveyed by the rotating conveyor first to a discharge station and again to the intake station, past the discharge station and, no sooner than upon a second reaching of the discharge station, removing the containers from the rotating conveyor, and wherein one section in the direction of transport between the intake station and the discharge station is passed through multiple times.

2. (Previously Presented) A process in accordance with claim 1, wherein the section is passed through two times, and that, upon every passage of the rotating conveyor in the intake station, only every second conveying station on the rotating conveyor is occupied, and, in the discharge station, only every second conveying station, displaced by one conveying station relative to the intake station, is emptied.

3. (Previously Presented) A process in accordance with claim 1, further comprising carrying out a processing of the container in the section multiply passed through, between the intake station and the discharge station.

4. (Previously Presented) A process in accordance with claim 3, wherein the processing of the same container is carried out upon every passage through the multiple through-passage section.

5. (Previously Presented) A process in accordance with claim 1, wherein the section multiply passed through is shorter than half the rotating section of the rotating conveyor, and that the containers only pass through this shorter section after the intake.

6-16. (Canceled)
